Re: Docket No. 2005-385-E

I urge you to go forward in establishing a policy of net metering in South Carolina. Our state needs to join with the 40 other states which require public utilities to purchase surplus power from their residential customers, thereby increasing the use of renewable energy sources, improving environmental quality, and reducing our dependence on fossil fuels, both domestic and foreign.

Thank you for your positive consideration of my views on this very important subject.
